

Making it easier...

SAMSUNG

Put the strength and experience of a multi billion dollar leader to work for you today.

Our leadership role in emerging technologies and packaging trends allow us to gain experience with new technologies while they're being developed. Now you can put this expertise to work for you.

We've overcome many of the same assembly challenges you face everyday. And it shows.

Samsung features a complete line of placement systems with standard features like fine-pitch and BGA vision inspection systems, on-the-fly non-contact component alignment with a true Windows GUI. Add to these standard features a large variety of component feeder options, systems priced below comparable assemblers and a world-

wide installed base in thousands and you'll see why the choice is simple. Simply Samsung.
